

Fence Post Supports

Drive in Post Spike - Bolt Secure

Drive in post spikes are a quick and easy way to erect fencing and garden posts as they require no digging or concreting into place, saving time and money. They feature a 4 fin steel spike to ensure a solid, permanent, wind resistant fit.

Carriage bolts tighten and clamp the post firmly to prevent any post movement, as well as allowing for over / under sized post tolerance. Allows for removal of the post at a later stage if required. Prevents against post rot and decay as it will hold the base of the post above ground level.

Available in a red oxide powder coat to blend in with the fencing and provides medium rust protection or hot dip galvanised for maximum rust protection. Both options can be over painted if you wish.

For 4ft fencing use a 600mm spike, for 6ft fencing use a 750mm spike.

Drive in Post Spike - Quick Fit

Drive in post spikes are a quick and easy way to erect fencing and garden posts as they require no digging or concreting into place, saving time and money. They feature a 4 fin steel spike to ensure a solid, permanent, wind resistant fit.

The quick fit version features inverted fins inside the post holder section that will hold the post in a vice like grip. The system prevents against post rot and decay as it will hold the base of the post above ground level.

Available in a red oxide powder coat to blend on with the fencing and provides a medium rust protection or hot dip galvanised for maximum rust protection. Both options can be over painted if you wish.

For 4ft fencing use a 600mm spike, for 6ft fencing use a 750mm spike.

Driving Tool

The drive in tool is for use when driving a fence post spike into the ground. The tool is made from hardened plastic and will prevent the post section from being damaged when being driven in.
