

## Jigsaw Blades

### Blade Material Types

#### Bi-M (Bi-Metal)

Combining the flexibility of a HCS body with a HSS hardened cutting edge, resulting in a tough, shatter resistant blade. Longer service life leads to greater cost effectiveness per blade.

#### HCS (High Carbon Steel)

High Carbon Steel Blades for use with softer materials, such as hard and soft wood, plastics and laminated boards.

#### HSS (High Speed Steel)

Hardened steel designed to cut hard materials such as mild steel, aluminium and other non-ferrous metals.

### Cut Type

#### Straight

Standard blade type, comes in a variety of teeth types and blade lengths. Perfect for all general purpose applications.

#### Down

Reversed teeth to cut on the down-stroke. This prevents the splintering of decorative surfaces such as kitchen worktops.

#### Curve

These blades have a reduced blade depth to allow them to perform curved cuts.

#### Precision

These blades are made from a thicker plate to help achieve a 90° cut. It also makes this blade ideal for hardwood.

### Teeth Type

- **MSS - Milled & Side Set**

Rough/Coarse Cut  
Basic tooth pattern used on the entry level blades. A quick but fairly rough cut.

- **MWS - Milled & Wavy Set**

Fine/Medium Cut  
This pattern is used to give a fine, straight cut.

- **SSS - Side Set & Sharpened**

Fast/Medium Cut  
This configuration gives a fast, medium cut.

- **GTG - Ground/Taper Ground**

Clean/Quick Cut  
These top quality blades give a clean, quick cut in both wood and plastic.

## Bi-Metal Blades

LONGER SERVICE LIFE!

Product Code	Bosch Equiv.	Materials	Cut Type	Teeth Type	WL (mm)	TL (mm)	Cutting Cap. (mm)	TPI	Pack Qty (pcs)	Carton Qty (packs)
<b>PACK</b>										
<b>Wood Cutting</b>										
AHGS14BI	T144DF	All Wood Types	Straight	SSS ●	75	100	5.0-50.0	6	5	100
